# DemeGUT PLAIN ™

Plain Catgut Suture

DemeTECH'S Plain Catgut Sutures

DemeTech's Plain Catgut suture is an absorbable, sterile, surgical suture composed of highly purified connective tissue (mostly collagen) derived from either beef or sheep intestines. Due to an extremely short absorption period, DemeTech's Plain Catgut elicits only minimal reaction in tissues. The percentage of collagen in the catgut suture often determines the quality of the suture. Higher percentages of collagen allow for: superior tensile strength, longer absorption times, and lower reactions in vivo.

Characteristics of DemeTech's Plain Catgut Sutures:

- DemeTech manufactures its Chromic Catgut sutures with the highest quality collagen, maintaining a composition of 97%-99% of pure collagen.
- DemeTech's Plain Catgut is rapidly absorbed.
- Tensile Strength is maintained for about 10 days.
- Absorption is complete within 70 days.
- DemeTech's Plain Catgut is ideal for tissues which heal rapidly and require minimal support.

Tensile Strength	Material	Absorption Profile
Tensile strength retained up to 10 days	Monofilament — Beige	Complete Absorption — 70 Days
