DemeLON™

Nylon Suture Monofilament

DemeTECH'S Nylon Sutures

DemeTECH's NylON complies to the requirements of the European Pharmacopoeia (EP) of the USA (USP), JAPAN (JP) and Nylon 6 (N-6) of ISO 9001:2008 standards. NylON is available in either black or blue, and is offered in a wide range of sizes and needle types, suitable for general procedures of the cardiovascular, ophthalmic, plastic and general surgery. Monofilament nylon is a high tensile and pliable material. It is resistant to the growth of bacteria and has minimal tissue reaction. Nylon sutures retain their tensile strength for a period of approximately 20 years. Therefore it is recommended for use in cases where long term support is necessary and where non-absorbable sutures are indicated.

Characteristics of DemeTech's Nylon Suture:

- Very strong in length losses due to the knitting method
- Minimal tissue reactivity
- Excellent elasticity is evaluated for skin closures
- Although not absorbed, progressive hydrolysis may result in gradual loss of tensile strength over time.
